PROFESSIONAL SUMMARY

Detail-oriented Python Developer and entry-level AI/ML Engineer specializing in Django backend architecture, database management, and intelligent system frameworks. Foundational expertise in training basic machine learning models (Scikit-Learn) and integrating large language models like Google Gemini API. Adept at building data analytics pipelines and deploying full-stack web applications to solve business workflows.

TECHNICAL SKILLS

Languages & DBs:	Python, SQL, SQLite Core Frameworks
AI & Machine Learning:	Scikit-Learn, Predictive Modeling, Generative AI (Gemini API Integration)
Data Engineering:	NumPy, Pandas, Matplotlib Data Visualization Libraries
Web Technologies:	Django Backend Framework, HTML5, CSS3 Architecture
Developer Tools:	Power BI Desktop, Microsoft Advanced Excel, VS Code, Git/GitHub Suite

TECHNICAL PROJECTS

AI Resume Analyzer & Job Recommendation System

2026

Full-Stack AI Application

- Engineered an algorithmic evaluation system processing unstructured input text against keyword matrices to calculate precise, dynamic ATS relevancy tracking scores.
- Architected automated profile comparison structures using Django pipelines to extract latent entities and offer localized data feedback paths for resume optimization.
- Designed centralized analytical metrics charts displaying predictive matching levels to increase user interactive retention scores.

AI Driven Chatbot Infrastructure

2025

Natural Language Processing Application

- Built an asynchronous message routing layer managing user queries and executing dynamic payload distribution in real-time.
- Integrated foundational Google Gemini API modules seamlessly to generate context-bound language inferences and optimize text generation benchmarks.
- Constructed reliable core operational endpoints using Python backend structures to process server workflows with minimized error exceptions.

Bank Loan Intelligence Dashboard

2026

Business Intelligence Analytics Initiative

- Developed an end-to-end Power BI tracking environment displaying interactive KPI trends for credit issuance profiles and demographic loan defaults.
- Executed deep script-based data filtering, standard null correction, and value transformation strategies to stabilize incoming transaction datasets.

EDUCATION

Master of Computer Application (MCA)	2024 – 2026
Shri R.G.P Gujarati Professional Institute Indore, RGPV University	
Bachelor of Science (Computer Science)	2021 – 2024
Govt. College Sanawad, DAVV University	

CERTIFICATIONS

- o**Advanced Python Development Architecture** — Universal Informatics, Indore
- o**Full-Stack Data Engineering & Analytics Specialization** — Power BI, Advanced Excel, SQL
