Professional Summary

MERN Stack Developer with 6 months of internship experience building full-stack web applications. Proficient in React.js, Node.js, and MongoDB with hands-on expertise in RESTful API design, JWT authentication, and backend development. Experienced in e-commerce and healthcare domain projects. Passionate about clean code, scalable architecture, and user-centric solutions.

Education

P.M.B. Gujarati Science College, DAVV

Bachelor of Science in Computer Science – Percentage: 67.94%

Indore, Madhya Pradesh

Graduated: 2023

Professional Experience

MERN Stack Development Intern

May 2025 – October 2025

Ypsilon IT Solutions Pvt. Ltd. Indore, Madhya Pradesh

- Developed full-stack web applications using MERN stack with end-to-end features, serving real users in a live production environment.
- Designed RESTful APIs with Express.js, implemented JWT authentication and role-based access control for secure data handling.
- Built reusable React.js components with responsive design and integrated MongoDB with Mongoose ODM for dynamic data management.
- Maintained API documentation via Postman and collaborated with team using Git workflows (branch, merge, pull requests).

Technical Projects

E-Commerce Web Application | React.js, Node.js, Express.js, MongoDB, JWT, Bootstrap

- Built production-ready e-commerce platform with user auth, product catalog, shopping cart, checkout, and order management.
- Implemented JWT authentication, scalable RESTful APIs for products, orders, payments, and responsive mobile-first UI with React.js.
- Applied MVC architecture, reusable component design, and clean code practices for a maintainable and scalable codebase.

Blood Bank Management System | Node.js, Express.js, MongoDB, Mongoose, JWT, Postman

- Developed backend system for blood donor registration, blood group inventory, and hospital donation request management.
- Architected RESTful APIs for donor search, blood availability, and admin operations with optimized MongoDB query performance.
- Implemented JWT authentication with distinct permissions for donors, hospitals, and administrators.

Technical Skills

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, React Router

Backend: Node.js, Express.js, MongoDB, Mongoose, RESTful API, MVC Architecture

Tools: Git, GitHub, VS Code, Postman, npm

Core Competencies: Full-Stack Development, Backend Development, JWT Authentication, CRUD Operations, Database Schema Design, Responsive UI, API Optimization, Version Control, Problem Solving,
